

NATIONAL & CAPODISTRIAN
UNIVERSITY OF ATHENS

JULIA & ALEXANDER N. DIOMIDES
BOTANIC GARDEN

INDEX SEMINUM

ATHENS - GREECE
2014

General Information

Year of foundation: 1952 (open to the public since 1975)

Area: 186 hectares

Situation: The garden is situated 3 km inland, 14 km west of the city center of Athens, at the area Dafni of Attiki (longitude: 23° 40' E, latitude: 38° 05' N)

Altitude: 100-250m (100-170m in cultivated area)

Soil: pH higher than 7.0

Climate: Absolute min. temp. (1972 - 1995): - 4,5 °C (9.2.76)
Absolute max. temp. (1972 - 1995): + 45 °C (27.7.87)
Lowest relative humidity (1972 - 1995): 41% (17.5.72)

(The climate data above refers to the Botanic Garden itself and not to the surrounding area)

The ombro-thermic diagram of the area according to climate data originates from the Meteorological Station of Elefsina (longitude: 23° 33' E, latitude: 38° 04' N, period: 1958-1997).

Explanation of the accesions

The series of numbers appearing in the first column is the IPEN-number. All plant material supplied by an IPEN member, need to be accompanied by an IPEN-number that remains connected with that material and its derivatives of all the upcoming generations. Through this number, it is possible to trace back where and under which conditions the plant material entered the IPEN.

The IPEN number is consisted of the following four elements:

1. Abbreviation of the country from which the material is originated, according to an international standardized Country Code List obtainable by BGCI-Botanic Garden Conservation International. The abbreviations used in this seed list are the following :

AT = Austria

BE = Belgium

BG = Bulgaria

CA = Canada

CY = Cyprus

DE = Germany

GB = United Kingdom of Great Britain & N. Ireland

GR = Greece (Hellas)

IT = Italy

KG = Kyrgyz Republic

KP = Democratic People's Republic of Korea

NL = Netherlands

TR = Turkey

US = United States of America

XX = unknown origin

2. Restrictions of transfer (“1” if a restriction exists, “0” if no restriction exists).

3. Garden Code from which the IPEN number is originated: A Garden Code is provided to every newly registered IPEN member. A list of the Garden Codes will be referred at the BGCI website. The code of J. & A. N. Diomides Botanic Garden is ATHD.

4. Identification number is consisted of two elements: year of seed or spores collection/acquisition number.

The abbreviations appearing in the third column stand for the status of the plants from which the spores or seeds had been collected, as well as the area of the collection:

Cult. = seeds of cultivated plants

Cult.* = seeds of cultivated plants belonging to an indigenous taxon in Greece

Cult.^o = seeds of cultivated plants belonging to a spontaneous xenophytic taxon in Greece

Spont. = seeds of spontaneous plants

Subspont. = seeds of subs spontaneous plants

Spont.⁰ = seeds of a spontaneous xenophytic taxon in Greece

Subspont.⁰ = seeds of a spontaneous xenophytic taxon in Greece

Spont.² = seeds collected by students of two primary schools. Department of the Educational Network "Seed, the fountain of life"

ATHD = Julia and Alexander N. Diomides Botanic Garden

Collections

Every seed lot is collected by employees of the Botanic Garden, supervised by Dr. Vallianatou I., Porevis S. & Papanikolaou I. The Botanic Garden is collaborating with the "Lavrio Center for Environmental Education" through the Educational Network "Seed, the fountain of life". Two secondary schools (2nd high-school of Lavrion and 4th of Virona) spent a day collecting seeds in the Sounion National Park and Imittos mountain respectively, under our guidance. The collected seeds are now kept in the Seed Bank, as a department of the network. These seeds are included in this seed list and marked below.

Taxonomy & Nomenclature

Taxonomy and nomenclature are based largely on the following:

Davis, P. H. (ed.) (1965-1988). Flora of Turkey and the East Aegean Islands 1-10. Edinburg University Press.

Dimopoulos, P. & al. (2013). Vascular Plants of Greece: An annotated checklist. -Berlin: Botanischer Garten und Botanisches Museum Berlin-Dahlem; Athens: Hellenic Botanical Society [Englera 31].

Greuter, W., Burdet, H. M. & Long, G. (eds.) (1984,1986,1989). Med-checklist. Vois. 1,3,4. Genève & Berlin.

Strid, A. & Tan, K. (eds.) (1997). Flora Hellenica 1. Koeltz Scientific Books. Konigstein.

Strid, A. & Tan, K. (eds.) (2002). Flora Hellenica 2. A. R. G. Gantner Verlag K. G. Ruggell.

The Plant List (2013). Version 1.1. Published on the Internet; <http://www.theplantlist.org/>

The Angiosperm Phylogeny Group (2009). An update of the Angiosperm Phylogeny Group classification for the orders and families of flowering plants: APG III.

Botanical Journal of the Linnean Society, 161, 105-121.

Tutin, T. G. & al. (eds.) (1968-1980). Flora Europaea 2-5. Cambridge University Press.

Tutin, T. G. & al. (eds.) (1993). Flora Europaea 1 (sec. ed.). Cambridge University Press.

Ordering seeds/spores

Please enter the fourth element (identification number) of the IPEN number of the seeds/spores required in the desiderata form. For example, if you wish to order seeds of the species *Cunninghamia lanceolata* Lamb. which is accompanied by the IPEN-number " XX-0-ATHD-2003/1", all you need to do is to write the number 2003/1 in one of the boxes in the desiderata form (only one number per box). Limit your requests to 25 items. Requests will be accepted until **February 2015** via ordinary mail, e-mail or fax and honored in the sequence of their receipt until the available supply is exhausted.

We would like to point out that the spores and the seeds listed below are the result of open pollination.

If you wish to ask any information about the habitat of any of the collections, please contact us at uoabotgd@otenet.gr.

General Secretary : S. Troianos
em. Professor of
the University of Athens

Curator : Dr. I. Vallianatou
Biologist

DESIDERATA 2014

Your full postal address:

.....
.....
.....

In response to the International Convention on Biological Diversity (Rio de Janeiro 1992), Botanic Gardens have to comply with article 15 (access to genetic resources), especially concerning the exchange of plant material only to those who use it in the sense of the Convention on Biological Diversity thus on the condition that:

1. Plant material and its products are just used for environmental purposes, with no commercial background in the areas of research, species conservation, education and development of Botanic Gardens.
2. The genetic material provided, its products or research derived from it must not be commercialized, neither by our exchange partners nor by a third party, without written permission from "Julia & Alexander Diomides Botanic Garden".

By requesting seeds from "Julia & Alexander Diomides Botanic Garden" you confirm to accept these conditions.
